

Accounting Software

We work closely with many accounting providers including Sage, Access Dimensions and Taz. Our support team can set your required package up and provide you with ongoing training. Below is some information on some of the popular accounting packages we supply.

Sage Line 50

Sage Line 50 is the UK's most popular small business accounting solution and is recommended by the majority of accountants. It is the perfect solution for growing businesses requiring a powerful accounting system, which will accommodate their increasingly complex business requirements. Sage Payroll

With the introduction of complex payroll legislation over recent years, employers are finding it increasingly difficult to cope with the amount of paperwork involved in processing payments manually, not to mention the need to keep up with the changes to legislation and the many calculations involved. Access Dimensions is a fully-featured business and financial solution for large companies. It can be deployed over local or wide area networks or over a standard web browser and will bring the best available functionality to every area of your organisation. Built around Microsoft's full SQL Server database, its 'open-database architecture' and huge capacity enables integration with any number of other business applications - while maintaining excellent data processing speeds and superior levels of security. To find out what Support IT can do for your business, contact us using our online form or call us today on 0845 680 0210 to book your FREE Problem Prevention IT Audit Worth £295 Pounds!
